FOR SCRAP CONSUMERS

FERROUS OR NON-FERROUS, OUR QUALITY PRODUCTS ARE THE BEST. AND WE PROVIDE THE SERVICE TO MATCH.

WHAT WE PRODUCE

High quality products that are shipped to a steel mill, foundry or smelter. Because of the eddy current systems on the shredders, Advantage Metals Recycling produces one of the highest quality shred products in the Midwest. Other ferrous and nonferrous products are produced to meet customer specifications and market demands.

HOW WE SHIP

By rail or truck – most of our material is transported via rail and some is shipped via truck. All three of our Kansas City locations have rail access. Our intermodal transportation department controls the fleet of equipment to ensure on-time delivery to our customers.

To buy our scrap products, contact:

John Rakos, COO
